

## Looking Into the Whistleblower Who Says the Government is Hiding Alien Technology

The Joe Rogan experience Well that's why it's so weird when like this UFO disclosure thing comes out This guy didn't it just come out today a whistleblower this uh gentleman uh David Grush and David Grush Le let's let's find out who he is and what his uh credentials were But he essentially said that they are illegally hiding it from Congress and they're illegally hiding it from the American people but they have Offworld offworld craft in possession Who's the they in that It's somewhere Well it's in the the things they're saying is oh here let's read it Air Force veteran has made a bombshell claim that us government has recovered materials that could be proof of UFO S including an intact craft of nonhuman origin but they are keeping it a secret from the public David Charles Grush a veteran and former member of the National Geospatial Intelligence Agency and National Reconnaissance office has blown the whistle on this information Speaking with several news outlets about the crafts these are retrieving nonhuman origin technical vehicles call it a spacecraft If you will nonhuman exotic origin vehicles that have either landed or crashed Mr Grush told news nation Mr Grush served as the the the senior technical advisor for the unidentified aerial phenomenon analysis with top secret secret compartment and information clearance According to the debrief he also served as a senior intelligence officer in the National Reconnaissance office In total he has 14 years of experience serving serving as an intelligence officer So here's the question is that a sign up Is this uh we've got a nonhuman craft a psy op like if I was the government and I was working on some shit and I didn't want China or Russia to know about it and we could do some wild shit some anti gravity shit I thought it was totally nuts and I thought at first I was being deceived but it was a ruse Mr Grush told news Nation people started to confide in me approach me I have plenty of senior former intelligence officers that came to me many of which I knew almost my whole career that confided in me that they were part of a program He told the debrief that he's been that he's prepared many briefs on UFO S for Congress But last year decided to provide hours of classified information and data about the materials recovery program Mr Grush claims the materials recovery program was shielded from proper congressional oversight So this is what Bob Lazar has been saying forever This guy's saying that it was going on for 80 years So like this brings us back to the 19

forties I mean this is like this is means like Roswell this is what they were talking about when all the people that were at Roswell that were at the actual crash site and the actual claim they saw bodies And then there was two different aircrafts that were flown in to Roswell New Mexico and took the wreckage and flew it in two different aircrafts in case one of them crashed supposedly And they flew into Wright Patterson Air Force Base This has all been documented now that was a balloon It was just a balloon Why would they go through such lengths and why there's so many people that have so many stories about Roswell why are there's so many hokey goofy fucking explanations of what happened including it was a a parachute and there was there was human dummies like crash test dummies that were evolved There were crash testing things like not not according to the people that were there what what they saw was materials that could not be explained insanely light You would crumple it and it would immediately flex back to the the stage that was out there and they found things that had some sort of writing that resembled hieroglyphs They they don't I mean these people they could have all been full of shit It could have been just some story something happened and everybody told everybody and you're playing a game of telephone and the next thing you know it's this wild story of bodies and little tiny caskets and the you know and people being silenced and but the problem is the story is very universal when when they're all telling the story it's real similar man It's a real and the guy who was who was a part of the initial release he went public afterwards and said that stuff that we we showed the American public when they were sitting there I forget the gentleman's name Uh But he was showing like a piece of a weather balloon and they had this smile on their face and this is one day after the I think it was a Roswell Daily record They had the front page of the newspaper that the government has recovered it crashed UFO I mean I don't know how big the universe is I've heard it's hard to quantify in size Yeah that's it right there I mean what do you think the odds are in all of the universe that we are alone It's not good if if it is it's wild If it's just us it's wow what a weird fucking aberration But let's assume it's not us So for a species I mean we can look at where we are at we can make it to kind of the moon before we start fucking up Maybe Elon can get us to Mars maybe not But so let's assume that a species that was able to come like check us out is probably more advanced probably more intelligent I think they would run for the fucking hills Why Because we are idiots And I think anybody who viewed humanity from a a long enough more objective lens would say maybe we can just leave this trash planet alone for a little bit and

we'll come back after either they have killed themselves again and regrown into something better or when they come and visit us And he's the guy who's like he's ended his career to come out and talk about this stuff because he's like like this is nuts like this is And if you're a real patriot that's probably the thing you do And and apparently according to Saga on uh he was talking about breaking points The New York Times rejected this the Washington Post rejected this They didn't want to talk about it This is a gentleman So let's play this Uh These are retrieving nonhuman origin uh technical vehicles you know call it spacecraft if you will Uh it's probably not the right parlance but uh no kidding nonhuman exotic origin vehicles that have either landed or crashed We have spacecraft from another species we do Yeah How many Quite a number Where's the where's the whole interview that See if you can find Is that something you have to sign up for What is it What is it Meanwhile that might be a 100% government controlled organization that just promotes propaganda and that guy's working for them You gotta think about all these things Who are these folks ended up Interesting He's their fucking centerpiece Look at that Yes he is He looks a little tanner than usual Can we save ourselves from ourselves Joe To go back to the humanity sliding towards the brink It's possible Here's the 10 minute interview Ok Let's hear it How much just play it Let's just see what's a military program that has reportedly found wreckage of fully intact The UFO question what conclusion did you come to at the end of your time on the UAP task force Uh The UAP task force was refused access to um a broad crash retrieval program When you say crash retrieval what do you mean Uh these are retrieving nonhuman origin uh technical vehicles you know call it spacecraft If you will nonhuman exotic origin vehicles that have either landed or crashed We have sp spacecraft from another species We do Yeah How many quite a number You're kidding No I thought it was totally nuts and I thought at first I was being deceived It was a ruse People started confiding in me They approached me I have plenty of current former senior intelligence officers that came to me many of which I knew almost my whole career that confided in me They were a part of a program they named the program I've never heard of it And they they told me based on the oral testimony Um and they provided me documents and other other proof that there was in fact a program that the UAP task force was uh not read into Grush alleges the US government Hm does he keep going What else is there sir The entire American public has been lied to for decades Yes there is a sophisticated disinformation campaign targeting the US populace which is

extremely unethical and immoral You are saying to the human race for the first time an official intelligence representative at a high level from the US government is saying publicly we are not alone We're definitely not alone Absolutely The data points empirically that we're not alone Yeah Do we have bodies Do we have species Well naturally um when you recover something that's either landed or crashed um sometimes you encounter um dead pilots and believe it or not as as fantastical as that sounds It's true It's also harder for people to wrap their minds around the concept I don't know man it might be false Yeah Well he might be I'm fascinated He might be a government agent Well to unpack that a little bit you know So there are I can only speak to it from a military perspective So he was in the Air Force There are programs they're covered programs or there are uh programs that you're not gonna get read into and just because you're read into one program doesn't mean you're gonna get read into other ones So his clearance TSSC I is not an uncommon one It's um it's the same clearance that I held that I was in having a clearance There's two things right You have to have the clearance and then you have to have the need to know So you could view him saying we were not read into another program as something that would be conspiratorial or you could view it as like one program didn't necessarily have something to do with the other one So there's no need to actually read them in I'm not saying that's the case but I'm fascinated to understand It sounds like what he is saying is that the United States military is nesting that program the co the program to go recover And I would be fascinated to know how they are doing that invisibly I mean we're talking aircraft we're talking identification early on aircraft moving teams in this You know what I mean Like there's a lot of shit I'm not saying it's impossible I have But there are people that are coming forward So it's not like they're totally being quiet which is sort of they're coming they're coming forward with a piece of a pie I'd be fascinated how all the pieces of the pie fe uh fed together I'm not saying what he's saying isn't true But watching that actually for me with my limited understanding of some of the stuff he was talking about I have more questions that I would want to ask him Yeah I would want to ask him too We gotta get them get him on here I bet he would come on here I'm just kind of going fucking I feel like I feel like oh why didn't he contact us I think you might get more circular answers You might get more Maybe I asked too many questions Maybe the word I get good questions though Is he still in It might not even matter I don't even know if they probably allow weed in the current military You might get more circular answers than specific ones If

you if you look at the answers that he was he was giving And again I'm not trying to discount what he's saying And I personally like I have said many times I think it's improbable that we're alone He was speaking in generalities and not specifics He was talking about other people's experiences less his own Yes that's a good point And that's my question would be What have you seen What have you seen physically with your own eyes What have you touched What do you know for a fact And again I'm not saying he hasn't had those experiences but I would ask those same questions as well And it's just from my understanding of how the military will compartmentalize as all organizations who actually want to keep information or at least delay the release of information Carmen compartmentalization is not a novel concept Well that's what Bob Lazar said was the problem with the back engineering program He said that science can't exist like that in a vacuum And the the propulsion experts were not allowed to talk to the metallurgists The metallurgy experts were not allowed to talk to the biology experts The the he said all if they really did have physical bodies the people that were working on the propulsion system had no knowledge of that weren't allowed to talk about it but they were all there was all chatter everyone would talk about things and apparently there was some sort of a debriefing they gave them and in that debriefing he said it was so nuts He said the first of all they said they would they've been coming here forever And they also said that we're a product of accelerated evolution which is wild as fuck that human beings in general that we why we are so different from all the other primates I mean that's always been the fucking conspiracy theory folklore That's the fun one you know is that they came down that's the Annunaki that came down here and and messed around with lower primate DNA and did something to it to create a human being I'm here for it I'm here for that That would make everything fun And then I would think that the government would want stuff like this to come out if they're in the middle of like stealing money or doing something really wild Classic misdirection for sure Yeah If you're gonna take something that gets rid of a certain amendment or you're gonna do something that allows you to infringe on rights or to impose some new sort of restrictions and bring the aliens out bring the aliens out
