

Sam Tripoli on Operation Highjump: Nazi's, Aliens, and Antarctica

The Joe Rogan experience Yeah Have you ever looked into Klaus Schwab's like dad no Have you ever heard of New Schwab Inland New Schwaben Land You never heard of New Schwaben Land Have you ever heard of Operation uh High Jump I knew I was gonna love this podcast No dude it's Operation High Jump What does that mean Ok So uh at one point some people like what's going on with Antarctica have you heard of this where they sent Admiral Bird up What's going on in Antarctica Yeah So the US government's like something's going on with Antarctica There's some activity up there We want to find out what's going on So they send this cat named Admiral by up to investigate with a giant fleet uh like uh just AAA A fleet to go to go bang bro You know when was this I think this was in the uh when was Eisenhower in was it the Yeah it was like right around like just uh either around World War Two or right after it And so they sent IL by up to go find out And according to his journal that they found much later he he basically met with UFO S Nazi UFO S What Yes Nazi UFO S the Nazis the Nazis had a like a flying saucer ha ha Had made a deal basically working with You've never heard this It's the greatest story ever bro It's the greatest story Nazis made a deal with the aliens for technology and the deal was they were gonna work together Ok I know this sounds crazy So basically the aliens go down and and Klaus Schwab's dad go down and meet with Eisenhower is gonna be like we could we could either do it one way or the other way we could do it nice or we can do it the wrong way And that's where they say Eisenhower made a deal with these aliens that they could kidnap people and do experiments but they couldn't just do it anywhere They had to they had specific places which were our National Forest Yeah dude you've never heard of them You're making this sound as if this is like a story that is commonplace Well for my people it is Jamie Count me out here Have you heard the story You've never heard of this You've never heard of operation High Job bro I feel like I've heard of that but I haven't not in this context This sounds amazing Please keep going And this is where the missing 411 come from The missing information What missing information the missing 411 what do you mean by that Which is all these people have mysteriously disappeared in force and they don't know I'm talking about the missing 411 like information So missing 411 is the number of people that

have been abducted And it's all really weird because they all have like a lot of similar characteristics German born like German background Excuse me Highly intelligent And it like I don't know how weird you want to get bro I wanna get weird Ok bro They think like this might be some time traveling Nazi shit bro I know you're gonna think I'm crazy But it's true dude That's what they believe And they made a deal day these day folk who who when you say they believe who are these days the conspiracy people are they united on No there's a whole different there's a lot of warring clans bro There's a lot of warring clans dude How deep do you wanna go What is interesting is how advanced the engineering of the Germans was You know it's really interesting when you think about car manufacturers like Audi and Volkswagen Mercedes It's all out of BMW BMW Didn't BMW make engines for Nazi fighter pilots I think that's what they first started off I think that's what BMW did Right 100% And then we were Cody made Hitler a car Hitler had a race car that was never part of their marketing plan though That would have been a crazy campaign What does it say there 1939 BMW 801 DP Piston Radio Aircraft engine and national origin is Germany So in in that year they made World War Two planes they made engines for World War two planes So that's this wild man I mean IBM was making stuff for these camps too dude It's crazy Yeah Like they had computers talked about that before right What was that There's a book what did they do They were it was the precursor to actual computers It was like a uh filing system to keep track of stuff of who was where and what these I'm remembering this and and then oh yeah man it gets super weird but it was called IBM right Was it called something else I think it was IBM The book is called IBM and the Holocaust The strategic alliance between Nazi German I mean you ain't fucking around with that title huh That title is rough to fuck Do we do that Did we really do this The strategic alliance between Nazi Germany and America's most powerful corporation expanded Interesting So the the area and of Antarctica they went to was New New Schwaben land New Schwaben land Do you think that's why he dresses with the space So they're all in contact with the aliens I think Well dude I mean it gets in the see a lot of people think this is about power and money What do you think It's about it's spiritual war dude This is these people got all the money and all the power they got more than they could ever want I think they want complete control But that gets in the spirituality Not just complete control but lowering your vibration and and and jacking your loo you think they're doing that consciously or do you think they're doing it Like uh they're chasing the economics and along the way it

actually becomes a spiritual battle because everything is a spiritual battle I think it's done purposely I think they're they're evil I think I think they're they're low low there's low frequency stuff going on and they've made deals with people and things and that's why things going on That was very ambiguous But I understand where you're going with it I mean if you want me I just don't want to get too weird too fast bro But I'm like we just opened up We're good I uh I 100% believe it is a spiritual war and that these people are working with dark entities and that's what this is all about Let's imagine this If there was like uh an alien race that came here from another planet and gave just a random group of people uh technology gave them an understanding of things and how to do things How much of a record do you think they would keep of that wouldn't that be something that people would want to talk about But that but that's the beauty of the internet that we're now able to do that We could never do that before So that you think that's what the story is about The story is about they went there and they met with aliens and the aliens gave them information I mean Hitler was really into the occult like he would send people all over the place He had a lot of bad ideas He had a lot of bad ideas But see the occult has a negative connotation to it Not everything involved with the occult is negative and what the occult really means is secret So there's not as much Yeah it basically mean it means like it's hidden I I always associate it with people that believe in silly shit when someone starts talking about the occult I'm always like hm how do you feel about ghosts You know how do you feel like when people start talking about like dark magic I'm like for real You sure I believe in that There's some energy manipulation but I don't disbelieve I don't disbelieve Listen I like III I don't know what's going on I just kind of read stuff and I'm like how does this fit into the puzzle Right How does this fit fit into the jigsaw of life and you start looking around and you just start going Ok man this is interesting That is interesting This starts to make sense
